HSW/SD CEH/PDH)

Fundamentals of daylight availability, impacts of window and room  
geometry, glass properties, efficacy of daylight versus electric light, sun shades  
and light shelves, support of sustainability goals.

1:25 – 2:25 PM “Curtainwall Products, Performance and  
Practicalities” (1 HSW CEH/PDH)

Curtainwall selection, design, manufacture and installation recommendations  
for specifications; impact on LEED certifications

AIA WNY/Buffalo

**Presentations by The Garland Company Inc. Joe Phillips,**  
**Garland Regional Sales Manager presenting:**

2:35 – 3:35 PM “Sustainable Design/Green Roofing” (1 HSW/SD  
CEH/PDH)

The concept of sustainable design as it relates to commercial roofing;  
discussions of cool roofs, photovoltaic roofing, vegetated roof systems, recyclable  
roofing, materials with post consumer recycled content, and low VOC roofing.

3:45 – 4:45 PM “Cool Roofing Made Simple” (1 HSW/SD  
CEH/PDH)

Cool roof systems and how they prevent sun-related damage, increase roof life  
and help cut energy costs; how the sun attacks roofs; devise ways that reduce  
roof surface temperatures and cooling energy usage.

4:45 – 5:45 PM - Manufacturer product displays and Q&A.

Happy Hour Refreshments
